Project: Sea Water Cooling Pipework – Burrup Fertilisers

Client: John Holland

Location: Western Australia

Product: Industrial GRP Project (Discontinuous Wound)

Manufacture & Supply: DN150, DN200. Above ground pipework, PN12.

Approx Value: \$300,000

Year of Project: 2003/2004

Description: Design, manufacture and supply of fiberglass pressure piping, with flanged connections for site assembly by mechanical fitters. Spools were fabricated in 12mtr sections, with fittings incorporated where possible. Some site joining required fibreglass butt and strap joints. All pipework was coated in the workshop with a Green UV flow coat, which will offer a maintenance free outer surface for over 25 years.
